INFORMATION BULLETIN

SECRET

Subject: HUNGARY

GENERAL INFORMATION

I. ORGANIZATION.

No. 1. A mole on which there is one pipeline, of about 12 inches, in use, and another one in reserve. Above these pipelines there is a wooden bridge which has iron railings on its external side.

At the end of the mole, toward the port's entrance, there is a guard-post for the checking of the local small ships which enter, and leave, the harbor on their local schedule service.

50X1-HUM

No. 2. Position of buoys marking the barrier of the port's entrance.

No. 3. A quay on which there were three cranes moving on iron rails.

On

this quay also, a single-story depot which is used to store goods of general cargo.

50X1-HUM

No. 4. A quay on which there were four large cranes resembling those available at the Free Zone of Piraeus.

50X1-HUM

On this quay there is a large single-story depot having a triangular roof, the length of which covers almost the entire quay. this depot is divided internally, into three large depots for the storage of grains, salt, and other goods. In front of the depot, and behind it, there are railroad tracks.

50X1-HUM

At point a of the above quay, a Customs guardpost where a control check is being made to the small ships serving the local schedules. This guardpost provides, also, the guard detail for the foreign vessels.

At point b, there were heaps of ore, and iron rods (for concrete).

No. 5. Position at which there is a newly constructed quay the embankment of which is almost completed. about fifty workers at this quay.

50X1-HUM

50X1-HUM

II. MARSHES.

Outside the Port six small torpedo boats.

III. FLOATING MACHINERY.

No. 6. Position at which there was a floating crane, of about ten tons.

This crane carried blocks from mole No. 3, to point c of a newly constructed quay.

No. 7. Position at which there is a dredging machine of the crab winch (vice) type.
